

To whom it may concern,

XM Radio provides those of us who pay monthly subscriptions to the service with commercial-free, uninterrupted and clear service throughout the country. Whether I listen to music, talk shows, weather, news or traffic reports, XM Radio has become an important tool in my life for entertainment and information without the clutter from annoying commercials or irrelevant information.

I believe NAB just wants control and more money funneled in to their organization and they see XM Radio as a threat to all that. They charge their members more than enough for membership (like \$500.00 per year), and that says to me their quite greedy. And it's greed that causes an organization like NAB to petition the government for more control over blossoming companies like XM Radio because they see them as a threat to their business.

Therefore, I urge the FCC to stronlgy reject NAB's petition 04-160 and allow those of us who enjoy the service XM Radio provides to continue enjoying uninterrupted and commercial-free programming.
